

Dr. Rafael Marín López
Phd Associate Professor
Dept. Information and Communications Engineering (DIIC)
Faculty of Computer Science-University of Murcia
30100 Murcia – Spain

To whom it may concern,

This letter is to indicate that Mr. José Padilla Martínez has been my student in the Degree of Computer Engineering and the Master of New Technologies in Computer Science at the University of Murcia, in the subjects related to Telematics and during the realization of Bachelor's thesis and Master's thesis where he has shown a high performance and commitment.

They were based on different topics related to security in SDN environments, more specifically with the application of security policies and associations between the different elements that make up the SDN scenarios, making use of IKE, and automating the processes of creating security channels between the different nodes of the network.

Therefore, taking into account all the experience I have gathered working with Mr. José Padilla Martínez, I know his interest in participating in projects related to security, networks and computing in general, and I firmly believe that he will show a high level of commitment and will be a very suitable candidate in any project where he collaborates.

Sincerely yours.

Date 13/12/2020

Dr. Rafael Marín López
Phd Associate Professor in Dept. Information and Communications Engineering (DIIC) at the University of Murcia (Spain).
